AREA 96 ACRES

TENTHS OF MILE

DICKWOOD LAKE

Eagle Lake Twp., Aroostook County
U.S.G.S. Wallagrass Lakes, Me (7 1/2')

Fishes

Brook trout
Minnnows
Redbelly dace
Finescale dace

Blacknose dace
Creek chub
White sucker
Banded killifish

Physical Characteristics

Area - 90 acres

Maximum depth - 8 feet

Principal fishery: Brook trout

Temperatures:
Surface - 68⁰F
8 feet - 68⁰F

Dickwood Lake is surrounded by approximately 3,860 acres of state owned wildlife management area that was acquired in 1989 with bond money for land acquisition. An additional adjacent 500 acres is owned by the town of Eagle Lake.

Dickwood Lake is shallow with equal temperatures from surface to bottom during the critical summer months. Trout seek cool spring areas to survive during the warm weather. A large population of suckers reduces trout production by competing for available food and space.

Access to Dickwood Lake is via gravel road suited for 2-wheel drive travel with occasional 4x4 sections due to washed out culverts. No improved landing exists and a ten-minute foot path completes access to the pond.
